

## As easy as it gets

TurnAid is Danish design and Danish produced and is a unique combination of an electric turning aid and side rails.

TurnAid optimizes the workflow associated with the reversal, displacement and seating of persons with severe physical disabilities.

TurnAid is developed in cooperation with Dansk Plejetechnik A/S and is a new turning and moving system.

## Safety and dignity

TurnAid improves the working environment and increases safety and dignity through work and stays in and around care beds.

TurnAid is easily installed on most types of care beds using the built-in universal bracket and meets the Medical Directive.

TurnAid can handle people with a weight up to 200 kg. and gets the job done with maximum consideration for both user and staff.

**Foot control, extra hand remote and white sheets can be purchased.**
